

Major League Baseball Website

Major League Baseball (MLB) is a professional baseball organization, the oldest of the four major professional sports leagues in the United States and Canada. A total of 30 teams now play in the American League (AL) and National League (NL), with 15 teams in each league.

The Challenge

The management of Major League Baseball (MLB) had a new project to be completed among many other ongoing projects for their mlb.com website and another website called mlb.tv. They needed a new team to manage the EBIS2 application which is where Software Merchant Inc stepped in.

Software Merchant Inc

Software Merchant Inc is well-positioned in the software consulting and services segment of the outsourced product engineering market. We provide cost effective and efficient Mobile application solutions by using best practices and employing a smart combination of experts from our worldwide pool of resources. We ensure a better understanding of the business and ensure seamless communication with our clients by bringing in local consultants with rich domain expertise.

The Solution

Software Merchant Inc. deployed their team of senior Java developers along with Business Analysts, architects and testers to carry out and manage this new application.

The Benefits

Software Merchant Inc. developed an application which is a total backend application for Baseball commissioner's office and also for clubs/franchises. This application managed players for all clubs for major leagues and minor leagues. This application helps to manage all transactions for players including their contracts and other details. Along with that, the application makes sure that all transactions are bound within the rules defined by baseball commissioner office and additionally, it manages role based access to all clubs and commissioner's office plus manages notifications and alerts for them based on their roles.
